Santiago Maximiliano Paz Farfán

Houston, Texas | +1 (281) 846-0864 | maximiliano.farfansp@gmail.com | github.com/MaxFSP | LinkedIn

Summary

Full-stack software engineer with 3+ years building web applications and backend services. Experience spans TypeScript, React, Next.js, Python, and AWS, including healthcare data processing, API integrations, and reusable UI components.

Technical Skills

Languages: TypeScript, JavaScript, Python, PHP
Frontend: React, Next.js, Redux, Tailwind CSS, React Native
Backend & APIs: Node.js, NestJS, FastAPI, GraphQL, Symfony
Databases: PostgreSQL (SQL), DynamoDB (NoSQL), Supabase (personal projects), MongoDB (coursework)
Cloud & Tools: Amazon Web Services (AWS), Docker, Git, Linux
Testing & Delivery: Jest, Vitest, CI/CD, Scrum
Spoken Languages: Spanish (native), English (fluent)

Professional Experience

CrowdTech | Remote
Software Engineer | Dec. 2025 – Jun. 2026

- Built React and Next.js applications for real estate businesses, connecting user interfaces to GraphQL APIs.
- Translated business workflows into application features and provided feedback through peer code reviews.
- Managed CI/CD and release workflows for AWS-hosted web applications.

AssureSoft (Client: Raintree Systems) | Remote
Software Engineer | Apr. 2025 – Dec. 2025

- Built batched audio uploads for files too large for a healthcare platform's GraphQL requests, using AWS Lambda to validate file integrity and forward audio to a proprietary AI model for processing.
- Developed AWS Lambda services and implemented role-based access control (RBAC) using PostgreSQL and Amazon Verified Permissions.
- Evaluated AI-assisted development tools, built technical demos, and recommended practical workflows for engineers.

Blacksheep Global | Remote
Software Engineer (Part-time Contract) | Dec. 2024 – Apr. 2025

- Built a serverless backend with GraphQL, AWS Lambda, and DynamoDB to support real estate analytics data flows.
- Mapped business processes with stakeholders and translated them into engineering requirements.

CrowdTech | Remote
Software Engineer | May 2023 – Apr. 2025

- Developed frontend applications and landing pages using TypeScript, React, and Next.js for real estate companies.
- Built reusable UI components and responsive layouts with product and design teams to maintain consistent UX.
- Implemented server-side rendering (SSR), incremental static regeneration (ISR), and performance tuning to support SEO and page speed.

Open Source Projects

PearAI | Aug. 2024 – Jul. 2025
Open Source Contributor | TypeScript, React, Electron, FastAPI, Docker

- Contributed across desktop app, backend, website, and documentation repositories for the 1.0.0 release.
- Fixed chatbot shortcuts and UI issues, updated authentication endpoints, and supported Docker-based Linux builds.

Education

UNEATLANTICO & UNINI-MX | Spain / Mexico (Remote)
Master of Business Administration (MBA), in progress | Expected 2028

Escuela Militar de Ingeniería | Bolivia
Bachelor's Degree in Systems Engineering | Feb. 2020 – Nov. 2024

- Ranked first in class; graduated with honors; received a Scholarship for Academic Excellence.
